Patrick

Thanks for sharing the draft RTC document from ND. I've been out of the office the past 10 days and getting caught up on email today. I'm looping Andrea into this email in case she hasn't already been included in a subsequent message.

I see we are talking about this situation on a call tomorrow, so I'll look forward to catching up and discussing these issues then.

Here is the draft response ND has sent us. I am still reading over it but would appreciate any feedback you all have.

Subject: North Dakota Source Determination Memo for CS and CCMC - DRAFT

Gail and Patrick,

As a follow-up to our call on February 14, 2019 and regarding the ongoing work with EPA in completing our stationary source determination for the Coyote Station and Coyote Creek Mining Company; please see the attached DRAFT source determination.

The Department has appreciated EPA's comments to date and requests EPA Region 8 review the attached. A follow-up with the Department would be appreciated to provide assurance that the direction taken satisfies the source determination criteria (or provide feedback on the Department's DRAFT determination). This will help ensure not only that the proper decision will be made, but the supporting documentation sufficiently supports this decision.

Please contact me upon review to discuss the next steps.

Thanks,

David Stroh
